Regarding claims 1, 29 and 56, Ward teaches a system where a user interacts with computer software using stylus. Ward teaches an interface system that provides the user with feedback and a movement of stylus that generates movement data. See col. 3, lines 1-19. Ward teaches tablet controller as well as an interface processor (32) that manages input from a tablet and presents feedback to the user through ink and mask planes (42, 44). In addition the tablet controller starts and stops sending data depending on a user initiative See col. 7, lines 47-67 and col. 30, lines 19-34. Ward teaches a user interface as called by an application where the main processor can pass a code to the interface processor identifying the service to be performed. See
